RE: Information Security Services Appointment - Confirmation Letter

This letter confirms that SolveXia Pty Limited (SolveXia) appointed Sense of Security Pty Limited (SOS) as their information security advisor on the 22nd of August 2013.

Founded in 2002, SOS is a wholly owned and operated Australian company delivering specialist Information Security and Risk Management consulting services.

SOS is contracted to perform regular penetration tests on the external network that hosts SolveXia's business process automation tool. The penetration tests are performed with reference to industry leading methodologies and designed to ascertain the extent to which the environment is susceptible to compromise. The findings from the penetration tests are documented and then presented to SolveXia's management for remediation.

The most recent penetration test cycle has been conducted in October 2017.

SOS looks forward to being of service to SolveXia again in the future.

Yours sincerely

Jai Blinman
